Karmina Sans

A versatile and vivid textface for an impressive read

DESIGNED BY

YEAR

Veronika Burian José Scaglione 2009

Karmina Sans was developed by Veronika Burian and José Scaglione as a large type family with its own features and personality, able to perform alongside its serifed cousin, Karmina.

Karmina Sans shares the same technical excellence and has the same basic proportions, but promises to be a much more versatile tool for editorial designers. Its intermediate weights match the proportions and weight of Karmina Serif and are excellent for setting everything from short texts to long works requiring extended reading, whether digital or in print. The extreme weights at either end of the spectrum are intended for headlines above 14 points and for corporate identity programs.

Early in the design process some of the calligraphic influences present in the serif version were ironed out because they were ineffective in the sans style. For example, the kink on the bowl of the 'a' was smoothed, the counter in the 'e' made bigger, the connections in the italics were made shallower, and the curved strokes on the italic 'z' were straightened.

Multiple master technology, with the light and extra bold weights as starting points, was used to create three weights by interpolation and a heavy weight by extrapolation process.

The characters were then finalised by hand for optimal vividness and versatility. The heavy weight is so potent that it delivers one of the darkest and most powerful impressions out there, all while remaining legible.

Karmina Sans comes in twelve styles and speaks multiple languages. It supports Latin A Extended and has ligatures, small caps, a full range of fractions, superior numbers and letters, five sets of figures, and other typographic niceties.

The complete Karmina Sans family, along with our entire catalogue, has been optimised for today's varied screen uses.

Be sure to check out Karmina to complete the look of your design with a highly legible and economic typeface that is perfect for extended reading.

As might have been foreseen, Franconia proved to be an excellent place in which to study the difficult family of flycatchers. All our common eastern Massachusetts species were present – the kingbird, the phoebe, the wood pewee, and the least flycatcher – and with them the crested flycatcher (not common), the olive-sided, the traill, and the yellow-bellied. The phoebe-like cry of the traill was to be heard constantly from the hotel piazza. The yellow-bellied seemed to be confined to deep and rather swampy woods in the valley, and to the mountain-side forests; being most numerous on Mount Lafayette, where it ran well up

Linguagem pode se referir tanto à capacidade especificamente humana para aquisição e utilização de sistemas complexos de comunicação, quanto a uma instância específica de um sistema de comunicação complexo. O estudo científico da linguagem, em qualquer um de seus sentidos, é chamado linguística. Atualmente, entre 3000 e 6000 línguas são usadas pela espécie humana, e um número muito maior era usado no passado. As línguas naturais são os exemplos mais marcantes que temos de linguagem.

Et språk er et dynamisk sett av synlige, hørbare eller følbare symboler for kommunikasjon og elementer som brukes for å manipulere dem. Språk kan også henvise til bruken av slike systemer som et generelt fenomen. Eksempler på språk er naturlig språk (menneskelige enkeltspråk, for eksempel norsk), kunstige språk (for eksempel esperanto) og programmeringsspråk (for eksempel Java). Menneskespråk omtales vanligvis som naturlige språk, og vitenskapen om menneskespråk kalles lingvistikk. Den

Språk eller tungomål är en del av olika system för kommunikation, som används av människor och som vi börjar tillägna stora bitar av redan under våra första levnadsår. Barn lär sig använda språk lika naturligt, som de lär sig att gå. Språket kommuniceras exempelvis via talat språk, teckenspråk, kognitioner och skrift, som är bärare av språk i en rad olika kommunikationssystem. Begreppet språk har två nära sammanbundna men ändå separata betydelser; dels syftar det på det mänskliga språket som fenomen, dels syftar det

Vědecký obor zabývající se zkoumáním jazyka se nazývá lingvistika. Otázky týkající se filosofie jazyka byly pokládány již ve starověkém Řecku, byly zde otázky typu zda mohou slova reprezentovat zkušenost nebo motivovanost obsahu slov, konkrétními památkami jsou například Platónovy dialogy Gorgias a Faidros. Ještě časnějším dokladem uvažování o jazyku jsou gramatiky sanskrtu, nejranější záznamy o kodifikaci liturgického jazyka a uspořádání znaků do abecedy patří do období 8. století př. n. l. Il linguaggio, in linguistica, è il complesso definito di suoni, gesti e movimenti attraverso il quale si attiva un processo di comunicazione. La facoltà di rappresentare mentalmente un significato è presente in molte specie di animali, tra le quali l'essere umano. La capacità di elaborare e produrre un linguaggio verbale, nell'uomo, si è sviluppata a seguito di mutamenti strutturali della cavità orale. In particolare l'arretramento dell'ugola ha reso l'essere umano capace di esprimere una gamma sonora variegata e di control-

THE DESIGNERS

Veronika Burian studied Industrial Design in Munich and worked in that capacity in Vienna and Milan over a few years. Discovering her true passion for type, she graduated in 2003 with distinction from the MA in Typeface Design course in Reading, UK. Veronika then worked as a type designer at DaltonMaag in London for a few years, spent some time in Boulder, USA, and then her hometown, Prague, and is now enjoying life in sunny Cataluña, Spain.

Veronika is a type designer and the co-founder of the independent type foundry TypeTogether with José Scaglione, publishing award-winning typefaces and collaborating on tailored typefaces for a variety of clients. She is also involved with Alphabettes.org, a showcase for work and research on lettering, typography, and type design by women, and she continues to give lectures and workshops at international conferences and universities.

José Scaglione is a graphic designer, typeface designer, and co-founder of the independent type foundry TypeTogether with Veronika Burian, where they have published numerous award- winning type families. He teaches typography at the University of Buenos Aires, Argentina, and is frequently invited to lecture about typography and to lead workshops on typeface design at international conferences and academic institutions. José co- authored the book Cómo Crear Tipografías: Del Boceto a la Pantalla, and collaborated with Jorge de Buen Unna on his book Introducción al Estudio de la Tipografía.

In 2012 José acted as chairman of the Letter.2 type design competition and conference and he was appointed president of the Association Typographique Internationale (ATypI) from 2013 to 2017.

FAMILY UPGRADES

Buy a single weight (or more) now and get reimbursed if you buy the entire font bundle at a later time. This is a great way to explore a new typeface without full commitment. To take advantage of the upgrade, please email <code>info@type-together.com</code>.

CUSTOM WORK

We offer custom font solutions tailored to your needs. This includes developing new typefaces from scratch, modifying existing typefaces, extending language support, and creating logotypes. Please contact us for details at *info@type-together.com*.

LICENSING

Our complete font catalogue, along with the presented type family here, are available for print, self-hosted web applications, and app embedding from TypeTogether's online store. For other types of licences and more information, please contact us at *info@type-together.com*.

TESTING OUR FONTS

TypeTogether actively seeks ongoing dialogue with all type users and therefore offers free temporary licences to test any of our typefaces. The test fonts are fully functional and include the entire character set and OpenType features. To request test fonts, please contact us at <code>info@type-together.com</code>.

EDUCATIONAL & CHARITY DISCOUNT

TypeTogether offers a 25% discount on all typeface purchases for students and those in education (schools, departments, etc.). This discount also extends to NGOs and charities in general. Please contact us for details at *info@type-together.com*.
