

Postea

Combining the constructed and human feel while brushing away the dust from a century of geometric derivatives.

DESIGNED BY

Veronika Burian
José Scaglione

YEAR

2021

The Postea font family is Veronika Burian and José Scaglione's take on German geometric typefaces, reshaped with the right attributes for setting paragraphs and headings, and perfect for branding and text use. Some typefaces are a rough tool, like a pumice rock: abrasive to the senses, unforgiving, and unhelpful for most reading situations. Postea is an obsidian: smooth and classy, with attractive nuances in any light. The classic curves and purposeful details keep its individuality intact while allowing it to fit an incredible range of geometric font needs. Because of these qualities, Postea makes normal reading in paragraphs a cinch and your branding memorable.

Compared to midcentury attributes of restraint and a sparse appearance, Postea's deliberate play between character widths injects life and distinctiveness into its personality. The default 't, f' have lyrical doses akin to a robust evening drink and are rounded out with a serpentine 's' and rotund 'o, g, b'. Another nice surprise awaits: spacing for the Hairline weight is tighter for optimal use in large headings and titles, while the regular weights have the expected, slightly looser spacing for text. Setting the test word 'bogarts' brings all this together nicely, invoking a balance between a constructed and human feel while brushing away the dust from a century of derivatives.

Postea is opinionated and its modern stylistic sets allow it to be accommodating with softer, specially-designed alternative characters. SS01 replaces 'b, f, M, m, t', while SS02 changes only the lowercase 'a' to the round style, and SS03 swaps out the angled 'y' for a straight version. The fourth and sixth stylistic sets are packed with wallpaper-worthy geometric patterns, ornaments, arrows, and symbols aplenty.

Postea's 14 styles (seven upright and italic) and two variable fonts are accompanied by an all-new family of icons in three weights, which we developed a new, easy way to activate. Simply bookend the desired icon name with colons (:arrowUp: :chargingStation: :aid: :firstAid:), making sure to capitalise each word after the first word, then highlight and activate SS05. Icons include wayfinding, social interface, sanitary precautions like face masks, thermometers, and hand washing, and much more.

Postea is resilient in the number of ways the family can be used, and its recognisable characters make it a prime selection for branding, signage, corporate typefaces, and magazines. Beginning with midcentury virtues, Postea is the rational response for text — a lyrical take on geometric sans serifs.

Variable fonts are a new part of OpenType technology that allows typeface creators to design fonts, and users to organise and use them, in a more advanced way than was done in the past.

Rather than having one individual font style per font file (i.e., extralight, regular, bold, or extrabold), variable fonts are one file with almost infinite choices within a single “design space”, the total boundaries for a typeface’s appearance.

So what’s a design space? A design space is the total area containing all axes which the font user can customise: weight, width, serif length, optical size, and more. A series of sources (or masters or exemplars) determine the appearance of all lettershapes at certain positions on each axis.

Imagine a designspace like a chess board grid with sources lining the edges. Opposite sources usually have opposing characteristics, like extralight versus extrabold. A move in any direction affects the look of the font since the movement brings it closer to one source or another. The closer to one source, the more it will look like that one and the less it will look like the opposite source. So moving in the design space always causes a change in the look of the font. The

final characteristics of the font are defined by the total proximity to all exemplars — where it is located within the total designspace.

To get a more accurate picture, now imagine that this grid is not two-dimensional, but is a three-dimensional cube; it has depth, meaning the font creator has defined more than two axes. The user is able to move through that cubed designspace, and as they do the font changes in accordance with how close it is to the sources that have defined its look.

Thanks to variable font technology, this means graphic designers and web developers can use mathematically generated styles that, while never actually drawn by the font creator, still exist within that total design space. And the file size is just a fraction of what normal font files are. This is great news for developers, for data use on mobile, for rendering, and for prioritising speed and responsiveness — not to mention creativity!

In a few cases, when some glyphs cannot smoothly transition across the spectrum of instances, a modification called a “jump” is included. Currently not all software responds to variable fonts in the same way.

THE DESIGNERS

Veronika Burian studied Industrial Design in Munich and worked in that capacity in Vienna and Milan over a few years. Discovering her true passion for type, she graduated in 2003 with distinction from the MA in Typeface Design course in Reading, UK. Veronika then worked as a type designer at DaltonMaag in London for a few years, spent some time in Boulder, USA, and then her hometown, Prague, and is now enjoying life in sunny Cataluña, Spain.

Veronika is a type designer and the co-founder of the independent type foundry TypeTogether with José Scaglione, publishing award-winning typefaces and collaborating on tailored typefaces for a variety of clients. She is also involved with Alphabetes.org, a showcase for work and research on lettering, typography, and type design by women, and she continues to give lectures and workshops at international conferences and universities.

José Scaglione is a graphic designer, typeface designer, and co-founder of the independent type foundry TypeTogether with Veronika Burian, where they have published numerous award-winning type families. He teaches typography at the University of Buenos Aires, Argentina, and is frequently invited to lecture about typography and to lead workshops on typeface design at international conferences and academic institutions. José co-authored the book *Cómo Crear Tipografías: Del Boceto a la Pantalla*, and collaborated with Jorge de Buen Unna on his book *Introducción al Estudio de la Tipografía*.

In 2012 José acted as chairman of the Letter.2 type design competition and conference, and he was appointed president of the Association Typographique Internationale (ATypI) from 2013 to 2017.

FAMILY UPGRADES

Buy a single weight (or more) now and get reimbursed if you buy the entire font bundle at a later time. This is a great way to explore a new typeface without full commitment. To take advantage of the upgrade, please email info@type-together.com.

CUSTOM WORK

We offer custom font solutions tailored to your needs. This includes developing new typefaces from scratch, modifying existing typefaces, extending language support, and creating logotypes. Please contact us for details at info@type-together.com.

LICENSING

Our complete font catalogue, along with the presented type family here, are available for print, self-hosted web applications, and app embedding from TypeTogether's online store. For other types of licences and more information, please contact us at info@type-together.com.

TESTING OUR FONTS

TypeTogether actively seeks ongoing dialogue with all type users and therefore offers free temporary licences to test any of our typefaces. The test fonts are fully functional and include the entire character set and OpenType features. To request test fonts, please contact us at info@type-together.com.

EDUCATIONAL & CHARITY DISCOUNT

TypeTogether offers a 25% discount on all typeface purchases for students and those in education (schools, departments, etc.). This discount also extends to NGOs and charities in general. Please contact us for details at info@type-together.com.

For further information, samples, and ordering, please visit www.type-together.com.
